BLACK JACK

Applications

The Black Jack System combines the lifting and power supply units into a single piece of equipment that is designed with maneuverability, ergonomics, and ease of use as core design elements. Black Jack Systems range in lifting capacity from 40 tons through to 100 tons and have a variety of stroke lengths from 13" (33 cm) to 24" (61 cm).

Configurations

Standard Base or Close Fit Base for tight clearance scenarios.

Air

The pump comes with an air motor to operate the jack with the use of compressed air.

Electric

The pump comes with an electric motor to operate the jack conveniently from a wall outlet.

MAKING WORK SAFE!

6060 – 86th Avenue S.E. Calgary, Alberta, Canada T2C 4L7 T:(403) 720 7740 F:(403) 720 7758 W: www.hydra-tech.net

Accessories

Load Holding Rings

Self locking aluminum rings that allow for greater safety by providing a temporary support column under the load.

Extension Adapters

Help to increase the versatility of the jack by providing incremental adjustments to allow for higher lifts.

Swivel Saddle

When a perfectly square lift is not possible, the swivel saddle helps maximize contact with the load and allows for up to 5° of side load.
