

Rail Rider Service Table

Applications

The Rail Rider Service Table is the ideal tool for servicing railcars on the track. With a 2,000 lb capacity, 12" clearance, and 36" vertical travel this lifting table can be used for many tasks such as servicing couplers, draft gears, air reservoirs and center cushions. Fork pockets allow for easy transportation via forklift and a convenient handle allows for ergonomic placement once on the track. To make lifting operations safer for all personnel present, an extendable pendant control allows for the device to be operated at a safe distance.

MAKING WORK SAFE!
