Portable Pump

Applications

The Portable Pump is a convenient tool for powering your hydraulic tools where ever your job may take you. A 10,000 psi electrically powered pump with certified hoses is housed in a frame with lifting handles for ergonomic use.

Configurations

Two Jack Operations

The pump comes with a splitter manifold allowing for operation of two 10,000 psi hydraulic tools simultaneously (as seen below).

Single Jack Operations

This pump configuration allows for faster lifts when operating a 10,000 psi hydraulic jack, reducing your service time.

MAKING WORK SAFE!
