MOD-U-LIFT Lift Stand Series

Applications

The MOD-U-LIFT Lift Stand Series is a new Product developed to address special needs whereby the Lift needs to be used as a stand in special applications. The system is comprised of separate lifting and power supply units which can be attached and detached from each other allowing for convenient and safe lifting operations. MOD-U-Lift Systems range in lifting capacity from 60 tons through to 175 tons and have a variety of stroke lengths from 13" (33 cm) to 24" (61 cm).

Configurations

Air

The pump comes with an air motor to operate the jack with the use of compressed air.

Electric

The pump comes with an electric motor to operate the jack conveniently from an electric source.

Accessories

Load Holding Rings

Proprietary designed locking system that converts the lift into a stand!

Low Profile Spring Dolly

Designed to move Lift Stand

Extension Adapters

Help to increase the versatility of the jack by providing incremental adjustments to allow for higher lifts.

- Meets or exceeds ASME PALD 2005 for Stands
- Meets or exceeds ASME B30_1_2009 for Jacks.
- Designed to Best Engineering Practices.
- Compatible with existing Mod-U-Lift pump modules for easy upgrade path.
- Retrofit program available for cost savings.
- Faster setup time increases productivity.
